

# Asset Level Data Reporting

## Asset Level Data Reporting

Ron Stewart

U.S. Department of Energy Idaho National Laboratory

August 16, 2017

INL/CON-17-42823 Rev. 0

# Asset Level Data: Why?

- History
  - Paper SF-82: aggregated fleet data, then...
  - FAST: aggregated fleet data, and now...
  - FAST: detailed fleet data
- Why asset level data?
  - Solves problems inherent in aggregated data
  - Agency fleet management has matured
  - Provides more accurate picture of fleet & operation
  - Provides opportunities to simplify fleet reporting
- Required by EO 13693
  - Agency FMIS and reporting to FAST
  - FAST management team was already going there

# FAST Team: Our role...

- Develop, maintain, support FAST system
- Train & support agency fleet POCs
- Technical resource as agencies move to new data shape / reporting process

# FAST Team: How we can help...

- Answer questions
  - Data elements
  - Business rules
- Provide guidance and advice
  - Reporting strategies
  - Direct policy questions to appropriate resource
- Speak “geek”
  - We can talk with your technical support teams

# FAST Team: Our advice...

- Simplify
  - Simple hierarchy: few fleets
  - Simple reporting: few users, systems
  - Simple data: use defaults
- Start testing early
- Think about how you will verify
  - How will you know if data is right?
- Fix problems at the source
  - Fix data issues upstream (not in the data files!)
